### CORE COLLECTIONS ON THE VIETNAM WAR

This guide summarizes core holdings on: the war in Vietnam, Cambodia, and Laos especially during the Nixon and Ford administrations; the flight of refugees from Indochina after April 1975 and the admittance of many to the United States; the accounting of U.S. armed forces MIAs and POWs; and the issue of amnesty/clemency for U.S. draft resisters and military absence offenders.

The Library's website [www.fordlibrarymuseum.gov](http://www.fordlibrarymuseum.gov) includes a comprehensive Guide to Collections, plus detailed inventories to all "open" collections. The website has an ever-growing **Digital Library** of on-line archival materials, including some on the Vietnam War.

Upon request, Library staff can provide detailed database search reports locating files on specific topics. A recent "Vietnam" search (March 2012) yielded nearly 2,000 pertinent folder titles.

**NATIONAL SECURITY ADVISER FILES:**

During 1999-2000, in anticipation of the twenty-fifth anniversary of the fall of Phnom Penh and Saigon, the Ford Library staff identified and reviewed for possible declassification much of its National Security Adviser holdings on the Vietnam War. The project encompassed every folder title with the name of an Indochina country, person, entity, or event. Folders containing approximately 39,000 pages were so identified and reviewed. In the years since 2000, much additional Vietnam War material has been opened from less obvious file headings.

Primarily memos by NSC staff to the National Security Adviser, or by him to President Ford, regarding high-level issues in U.S. relations with North and South Vietnam, Cambodia, and Laos. Most of the material dates from the Nixon and Ford administrations, but there are earlier items dating to the Diem coup in 1963. A chronological run of backchannel cables between Ambassadors Bunker and Martin in Saigon and national security adviser Kissinger comprise most of the collection. In addition, there are talking points for meetings with South Vietnamese officials, mainly President Thieu; reports and memoranda of conversations from those meetings; drafts of speeches; drafts of proposed agreements prepared by both sides; and military situation and intelligence reports. Most of these records date from 1965-1970, but some concern the evacuations of Phnom Penh and Saigon, and the later transfer of refugees to the United States. The Ford Library staff has printed to paper, as an additional convenience to researchers, all operational records that date from the Ford presidency.
