THE WHITE HOUSE

WASHINGTON

September 29, 1976

MEMORANDUM FOR: MIKE DUVAL

FROM: DICK CHENEY *D*

In connection with preparation for the third debate, I want you to pull together some data that shows the increase in the work force over the last ten years.

Specifically, it should be broken down to show the total increase in working age population over ten years, the total increase in the labor force, the total increase in men in the labor force and the total increase in women in the labor force. I'm told that if you do it on a percentage basis, you'll find that while the labor force increase some 19% over that period of time, women in the work force increased 47% or something thereabouts.

I'm sure CEA can pull this together fast, and we may be able to use it in part to explain why the unemployment rate is higher today.
