Dear Mr. President:

On the occasion of the successful accomplishment of the first ever joint flight and docking of the Soviet Spaceship Soyuz and the U. S. Apollo, I am sending you and the people of the United States of America, sincere congratulations on behalf of the Soviet people and on my personal behalf. Please extend our congratulations and best wishes to courageous U. S. Astronauts Thomas Stafford, Vance Brand, Donald Slayton, and U. S. scientists, designers, specialists and workers who took part in the preparation for the fulfillment of the Soyuz-Apollo program.

As a result of the flight of the Soyuz and Apollo Spaceships, their docking in the Earth orbit and mutual crew transfers tested and practiced, have been the compatible systems of the Spaceships developed for increasing the safety of man's flights into space, and also displays the possibility of joint work in space of representatives of different countries. Being an important milestone in cooperation between the USSR and the USA in the exploration and use of outer space for peaceful purposes, the accomplished joint flight lays the foundation for the possible subsequent Soviet-U. S. projects in this field.

The success of this outstanding experiment was insured by the faultless fulfillment by the Soviet and U. S. crews of the complex flight program. It was the result of close and efficient cooperation of scientists and specialists of our countries at all the stages of its preparation and fulfillment. The experiment carried out, constitutes a major scientific technical achievement paving new ways for further space exploration for the good of all mankind.

The flight of the Soyuz and Apollo Spaceships is of historic significance as a symbol of the current process of easing of international tension and improvement of Soviet-U. S. relations on the basis of the principals of peaceful coexistence. At the same time it constitutes a practical contribution to the cause of further development of mutually beneficial cooperation between the USSR and USA in the interest of peoples of both countries in the interest of peace on Earth.

L. Brezhnev
